

About Unetixs

Our mission is to design and manufacture the most technically advanced and innovative diagnostic peripheral vascular testing systems available.

Unetixs is located in North Kingstown, RI and has been providing state-of-the-art peripheral vascular instrumentation since 1988.

The final production of all instrumentation, hardware and software development, and concept packaging is done in-house.

Unetixs offers a complete line of Vascular Diagnostic Equipment for your facility and your referral sites. Our low cost systems will accommodate all patient types, including those with medial calcinosis.

Unetixs also offers:

A dedicated staff of vascular professionals to assist you in creating a Vascular Diagnostic Program within your practice.

An IT department ready to assist you in networking solutions including DICOM and PACS communication.

Please feel free to request additional information on any of our products.

An information request form is available on our website, UNETIXS.COM
We look forward to working with you on your vascular application!

On-site Educational CME Packages

Let Marsha Neumyer and her staff provide on-site education in conjunction with the delivery of your new

Unetixs Vascular instrument.

CME credits apply with all educational products. Unetixs Publishing provides the manual *Physiological Testing Techniques and Interpretation* which you can read, take the test, and receive 5 CME credits!

Only Unetixs Vascular provides such comprehensive programs.

From Diagnostic ABI To Full Limb Assessment...

Unetixs is your Complete Diagnostic Vascular Solution.
